

Virtual Work Experience 18th – 22nd May 2020

Attention Year 10 students,

From a careers point of view, we are always looking at ways to support students at both schools with many career opportunities and options. Even at this extraordinary time and learning from home we would like to invite our year 10 students to take part in a digital work experience.

This opportunity is supported by Scape who have partnered with Class of Your Own, Learn Live and EDT (Engineering Development Trust) to introduce you to the myriad of career pathways available, the excitement of real project delivery and the satisfaction gained from helping to create something that will both serve the community and leave a lasting legacy on the landscape.

What's more, every student will secure a recognised accreditation to put onto their CV.

A week long programme

The syllabus is built around the Esteem Pavilion Challenge.

We will introduce a collaborative construction, design, engineering and project management challenge and will feature *all of the STEM subjects*.

- Design
- Engineering
- Construction
- Project Management
- Sustainability

Please register your interest via careers@smestow.org (both schools) and we will be able to provide you with the log in details.
